

61' Tall

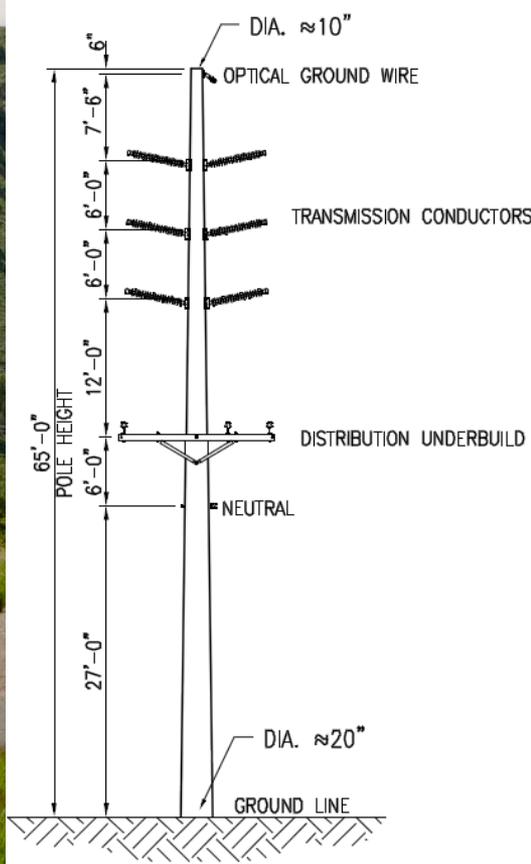

Existing structures view looking west from bike path (Buttercup Rd) toward WDR1 substation

65' Tall

**New double circuit transmission with distribution
Looking west from bike path**

(Note that this double circuit design does not combine the new transmission line with the existing transmission line between WRSS and Ketchum)

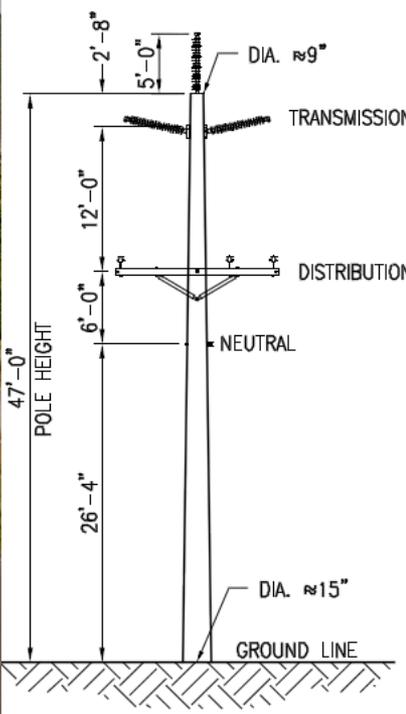

~ 40' Pole Height

Existing structures view looking north along bike path near Buttercup Rd.

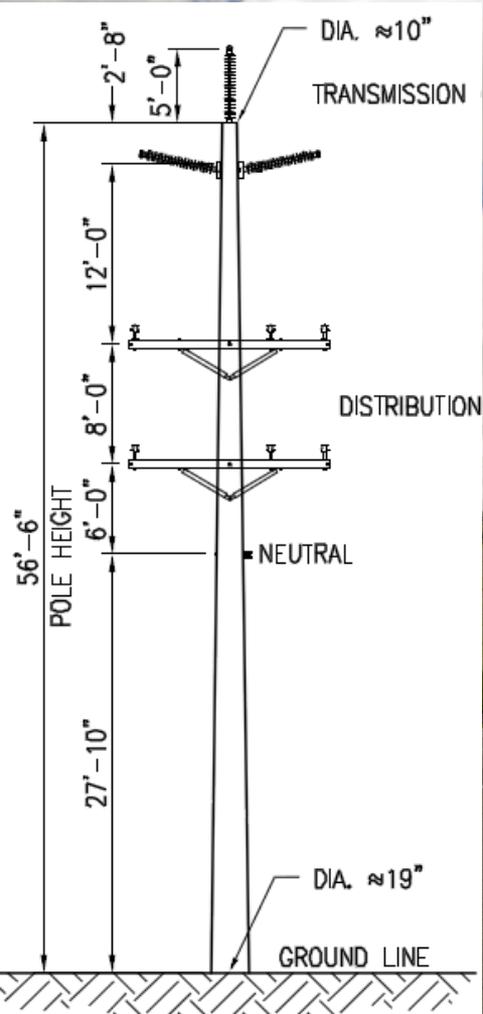

47' Pole Height

New 138 kV line (no shield) with Distribution
Looking north along bike path near Buttercup Rd.

**Existing structures view looking north
along SH 75 at Ohio Gulch**

**New 138 kV transmission (no shield)
Double circuit distribution
Looking north along SH 75 at Ohio Gulch**

Existing Structures

North of East Fork Intersection

Proposed New Structures

North of East Fork intersection

Transition Structure

**OH to UG transition structure
south of the medical center area**
(Concept only – final design and screening may vary)
