Re: Animal Shelter C.U.P.

Dear Tom,

Our office has reviewed the soils report and preliminary layout for the proposed onsite sewage system. Soils are adequate for the treatment and disposal of effluent, and there appears to be adequate room to accommodate this fairly large system while meeting DEQ's required setbacks.

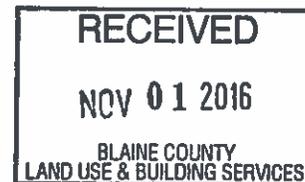

Benchmark intends to wait until the county approves the C.U.P. before drafting the engineering details and specifications for our review. Following approval of the final design our office will issue a sewage permit for the project.

If you have any questions, feel free to contact our office.

Sincerely,

Bob Erickson, REHS
