Subject: RE: No. Valley Power Transmission Line

Tom, I did forward your e-mail to the developer of the Cold Springs Crossing Apartment complex. He of course would want to see the line placed underground starting at south end of Hospital Drive and not the north entrance to Hospital Drive. I had inquired if this would mean that the cost of that undergrounding would then trigger a LID, so that the neighbors would then be responsible for the cost of that at a price that they do not know. I think that everyone would like to keep the transmission line underground for as long as is possible, it is merely a question of who pays for it I suppose. Marc

Subject: No. Valley Power Transmission Line

Marc,

I hope on is well on this Election (and nice) Day in the Wood River Valley. I was not sure if your client that developed the Cold Springs Crossing is aware of the proposed power transmission line along the east side of Hospital Dr., but if not the attached agenda is notice on a Nov. 10<sup>th</sup> hearing on this proposal. We did send notice to nearby landowners. Tom
