**Subject:** Opposition to Camp Rainbow Gold in East Fork

As a long time East Fork resident and a medical professional, the general inaccessibility of the proposed project makes this a very questionable location, especially when planning on building a large 200 bed facility to care for sick kids, their families and those not experienced in the wilderness.

As per the standards for evaluation, the following reasons indicate why this location is a bad idea:

- infrastructure of East Fork Road not intended for construction vehicles or the high number of vehicles needed to run and/or visit year round 200 bed facility, will cause destruction and damage, unsafe for large vehicles, no shoulder
- fire threat throughout canyon is always eminent and there is no way out, location of proposed project inaccessible for fire services
- 200 bed/multi use facility will result in excessive traffic, fumes, land and water contaminants, disruption of scenic land
- limited and unreliable phone service, no internet
- distance required to travel on dirt, gravel road makes it impossible to access the sick when necessary. Inaccessible for public services, police and fire impossible to access, limited water, no refuse removal, no sewage treatment.
- proposed year round land use will be highly disturbing to East Fork residents and will certainly impact the existing character of the area in terms of increased traffic and noise, potential water contamination, increase in refuse and sewage requirements
