Subject: Power line

Dear Commissioners,

As a full time resident of Blaine County and a resident of Audubon Place at East Fork road I wanted to alert you to the discriminatory practice that Idaho Power is proposing.

By under grounding the proposed power poles from the hospital or Elkhorn rd north and then having all rate payers pay for it but not proposing to underground the line on Audubon Plc where it is in front of homes, a narrow street and the bike path is discriminatory and wrong.

You as our elected commissioners have a duty to protect us citizens and rate payers. Our homes are the closest the power line will come in front of homes on its journey up 75 so if anyone of your constituents should have the benefit of under-grounding the new line it should be us if you don't make them move it to hwy 75 instead of on Audubon Plc.

The discriminatory practice Idaho Power is proposing for the citizens and cities of Ketchum and SunValley are not the way this issue should be handled and we ask you to protect our interests and life style in this beautiful valley.

You have the power to have all your citizens treated equally and fairly we hope you will do so.

Thank you for your time and hopefully successful effort on our part.

Sincerely,

John Milner & Kim Taylor
