Dear County Commissioners,

I understand there is a proposal to improve Quigley Road because of a small development that will be built beyond the WRLT property in Quigley Canyon. I am very sorry the development could take place at all given the wildlife in that area and the distance from the core of Hailey, However, if it must happen, I would urge you not to improve Quigley Road.

Quigley Road has been used for years by the entire community for hiking with friends, walking dogs, biking, riding snowmobiles, etc. My husband and I walk out there regularly and we always see people we know or meet someone we haven't met. We know many of the dogs by name. Quigley Road is especially busy in the winter when other trails are not available. The bike path is groomed for skiing and it is also used by walkers with their dogs and bicyclers. It could not possibly accommodate all the people and dogs that currently use Quigley Road. Where would all these people go?

To take away something that is used by so many, for so few, and to spent tax papers dollars to do it, is the wrong thing to do. Please consider the importance of the unimproved road to the whole community.

I hope you have experienced walking out Quigley for yourselves. If not, I urge you to do it. Below are a couple of photos that I snapped with my phone while walking out Quigley on a Sunday afternoon.

Sincerely,

Daralene Finnell
