Subject: [EXTERNAL]Quigley Canyon

Hello,

I have been to many meetings thus far but I won't be available for the March 1 Final meeting. I have been against this project from the get go. I went to every meeting prior to development and the City of Hailey totally ignored the people who were against this development and just ramrodded it through!

I am glad they continue to keep the trails and skiing out there and available, but I must put my foot down when it comes to moving and paving the road and building homes so close the hillsides! It makes me think of the age of castles and how they were elevated above the poor townspeople in Medieval days. What kind of view do they think they will have from these homes? They face the proposed 24 pod homes and the backs are so close up to the hillside they won't have a view. This is asking way too much. The elk, deer, pronghorn, fox, cougars and every wild animal is suffering too much as is, they need these spaces to remain open and free from encroachment of humans. What happened to their plans to stay lower in the Canyon? Greed, that's what happened. The Wood River is losing its heritage with all these unnecessary, unaffordable over built developments.

Time to find a new small town whose people in power will not bow down to wealthy investors ruining their beautiful surroundings.

Thank you for your consideration,

Jeanne Brydges
