Subject: [EXTERNAL]Quigley Canyon Hearing

To whom it concerns. I am for preserving the outskirts of Quigley Canyon the way it exists at present. I have written a letter similar to this multiple times. I'll say it again, there is no need for "estate" homes far out Quigley. All the development should occur at the mouth of the canyon where multiple units of slop have already been constructed. Those proposed lots are in the middle of winter range for wildlife. I am against paving the road as it will attract more traffic, which is something the citizens do not need. It's time to shut this proposed development idea down and bury it forever. Thanks for listening. Richard Stopol 150 6th Ave south Hailey, Idaho
