(This comment was also submitted directly to county commissioners)

Dear Commissioners McCleary and Davis,

Mirroring what others from the community have voiced, we strongly oppose further development. The road should not be paved but be maintained as it is. We also request that all discussions regarding

The canyon provides outdoor recreation year-round for residents and is truly cherished by the community. Visiting the canyon, going there three or more times a week to walk our dog, hike, bike, or skate ski. Visiting the canyon is extremely upsetting to hear that the area could face such development. There is no question, such development would impact wildlife habitat, water resources, and impact year-round recreation.

We moved here because of the proximity to the natural environment and all that Quigley offers. Please do not allow additional development in Quigley Canyon. Please preserve this treasured space.

Thank you for your time.
